Read more in the 2022 HP Sustainable Impact Report.
Bill and Dave brought a thoughtful mindset to business. In order to solve the problem we need to truly understand it; that we need to address challenges and fix systems, not just symptoms. Most importantly, everything in that system is interconnected; that we don’t stop at upgrading one component—we need to upgrade in tandem.

When it comes to solving the biggest challenges we face today, it is so easy to over-simplify. We reduce things down to a box to tick. HP believes there has to be a better way. A smarter way. A more responsible way. A way that takes into account everything is interconnected. That reducing your harm is part of it, but we must think beyond it.

That in order to take on big, expansive issues, we need big, expansive solutions. Solutions that tackle things holistically.

That go beyond the paradigm.

Simply put—we must Go Beyond.
Letter from our President and CEO

This mindset was instilled in the culture of HP by our founders and today, it has never been more important. Because when you think about the sheer scale of the challenges we face—from the growing threats of climate change to persistent inequality—it’s clear we have a lot more work ahead.

That’s why, at HP, we don’t treat Sustainable Impact as a separate initiative. It’s deeply embedded into how we run the company—from the way we design, manufacture and distribute our products, to the services and solutions we create to meet changing customer needs, to the investments we make to help people reach their full potential.

We’re constantly pushing ourselves to challenge the status quo and lead our industry forward. And we’re holding ourselves accountable, which is why every member of our executive leadership team is responsible for achieving specific goals each year.

Make no mistake: this work isn’t just good for the world, it’s good for our business. In 2022, more than 60% of our revenue met the Corporate Knights standard for sustainable revenue. This reflects the continued trend of customers choosing products and services that help reduce environmental impact—a trend we expect will only accelerate.

As a company, this makes our Climate Action, Human Rights and Digital Equity initiatives all the more important. Two years ago, we announced one of the industry’s most ambitious environmental and social impact agendas. Now, in our 22nd annual Sustainable Impact Report, I’m pleased to share how we are building on them.

Becoming More Sustainable & Just

HP is taking urgent and decisive action to achieve net-zero carbon emissions across our entire value chain, give back more to forests than we take, and innovate our products and services for a more circular economy. This starts with what we sell, and I’m proud that more than 95% of home and office printers, laptops, notebooks, displays, and workstations shipped to customers in 2022 included recycled materials.

Importantly, we’re not just accounting for our own footprint. We are going beyond by reducing our Scope 3 emissions. We have helped our suppliers cut their own carbon emissions by 1.7 million tonnes, and more than 3,500 of our channel partners across 40 countries have made their own sustainability commitments through our HP Amplify Impact program.

As we work to protect our planet, we’re also empowering people—both inside HP and across our communities. In the U.S., 46% of our new hires in 2022 self-identified as ethnic or racial minorities. Ultimately, we believe companies perform at their best when they attract diverse talent from all walks of life. And by helping people to reach their full potential while protecting human rights across our supply chain, we can help build stronger communities, societies, and economies.

This includes helping to close the digital divide. While the digital economy holds promise for so many people around the world, it also threatens to leave billions behind. That’s why we’re working to expand access to technology while creating training, curriculum and partnerships that empower underserved communities. Overall, we have now accelerated digital equity for 21 million people. That’s up four-fold since 2021 as we work toward our goal of 150 million by 2030.

This report provides a deeper look at each of these efforts. You will see areas where we’re doing well, and others where we need to improve. This is not about patting ourselves on the back—it’s about being transparent and outlining the steps we are taking to continue our progress.

HP has never been a company that shies away from challenges. It’s one that creates solutions beyond what we previously thought possible. And by harnessing that same spirit of innovation, we can keep changing the world for the better.

Saludos,

Enrique Lores
President and CEO
Sustainable Impact strategy

HP aims to be the world's most sustainable and just technology company. Sustainable Impact is at the heart of HP’s business strategy. Across our three pillars of Climate Action, Human Rights, and Digital Equity, it connects us to the most pressing issues of our time. Rooted in science, our strategy prioritizes the areas where HP’s technology, talent, and platform can make the most positive impact. Above all, it supports a culture that integrates purpose throughout our business.

We know we must stand for more than the products we sell, which is why Sustainable Impact is both a business imperative and a key differentiator for HP. We focus on doing the right thing, even when it is difficult, to deliver lasting value through the power of our technology. HP's sustainable revenue in 2022 represented more than 60% of total revenue, reported in accordance with the Corporate Knights Sustainable Economy Taxonomy, which defines sustainable revenue as revenue from products and services that help reduce environmental impacts.

Read more in the 2022 HP Sustainable Impact Report
### 2022 highlights

#### Climate Action
- **1.1 million MWh** of renewable electricity attribute certificates purchased by HP and our suppliers during 2022, covering the majority of our highest-impact final assembly sites in China.
- **43%** of HP production suppliers by spend participating in Science Based Targets initiative (23% validated by the SBTi and 20% evaluated by HP).
- **Nearly two million trees** planted with partners like the Arbor Day Foundation, WWF, and Conservation International. We more than doubled the area of forest under responsible management year over year, to a total of 33,460 hectares.
- **1 billion+** HP print cartridges have been returned to the HP Planet Partners recycling program as of December 31, 2022.

#### Human Rights
- **95%** of HP's total production supplier spend have gone through social and environmental assessments.
- **46,000** workers reached through capability-building programs.
- **46.4%** of our U.S. hires were from racial/ethnic minorities, and overall, 67% of our U.S. hires were from underrepresented groups, including women, racial/ethnic minorities, people with disabilities, and military veterans.

#### Digital Equity and philanthropy
- **7.4 million+** students and teachers equipped with technology solutions in India, Nigeria, and the United States through our partnership with Girl Rising.
- **2.9 million+** children reached through 342 books produced in partnership with NABU at the HP Creative Lab at the Kigali Public Library in Rwanda.
- **US$3.3 million** and 76,000 laptops donated to support refugees displaced because of Russia’s invasion of Ukraine.
- **258,000 hours** contributed by 15,600 employees in 60 countries during 2022, with a value of US$16.17 million, up about 90% compared to 2021.

Taking urgent and decisive action to achieve net zero carbon emissions across our entire value chain, give back more to forests than we take, and innovate our products and services for a more circular economy.

HP has a long-standing history of acting to protect the climate. Our ambitious, science-based goals are designed to combat climate change by focusing on greenhouse gas (GHG) emissions, product circularity, and forests.

We aim to decouple growth from emissions and resource consumption, drive innovation, and transform our business models. To decarbonize our supply chain, we encourage suppliers to set and meet their own science-based targets. At our facilities, we work to reduce energy use, increase efficiency, and source renewable energy. By shifting toward circular design, we are working to increase value for customers while reducing environmental impacts.

Working to counteract deforestation

Once the second largest forest in the world, the Atlantic Forest in Brazil is a richly biodiverse region, home to many species found nowhere else on the planet. However, unsustainable agriculture, development, and logging have caused rapid deforestation, leaving the area just 12% of its original size. Learn how HP, in partnership with WWF, is helping to restore it.
Building a culture of equality and empowerment within HP and beyond, where diversity is sought out and celebrated, and where universal human rights are understood and respected.

We embrace our responsibility to respect human rights, and believe in creating a culture of empowerment and equality within HP and beyond, advocating for universal rights, striving for policies that fight racism, and advancing social justice. We work through supplier agreements and our supply chain responsibility program to improve labor conditions within supplier factories and tackle industry-wide challenges, such as forced labor and conflict minerals.

Our employees are vital to HP’s success, and we provide innovative training and development opportunities to build their skills and help advance their careers. We value and foster a culture of diversity, equity, and inclusion, working to use HP’s platform, technology, and resources as forces for positive change.

### Advancing diversity in our supply chain

We partner with diverse suppliers like RLA Engineering to help strengthen Black/African American representation throughout our global supply chain. Collaborations like this also inform our efforts to be actively antiracist and to use our platform as a force for positive change. Learn about our progress.
Digital Equity and philanthropy

Accelerating equitable access to education, healthcare, and economic opportunity for those who are traditionally excluded so they can participate and thrive in a digital economy.

HP aspires to help create a more equitable world through access to hardware, connectivity, digital literacy, and quality, relevant content. Our impactful programs, strategic investments, and partnerships prioritize those most likely to experience the digital divide: women and girls, people with disabilities and aging populations, historically disconnected and marginalized groups, educators, and healthcare practitioners. By addressing digital equity, we are supporting more equal access to education, healthcare, and economic opportunity.

HP’s commitment to positive, lasting change extends to how we design products, solutions, and services. Our portfolio is enabling better learning outcomes and accelerating digital equity for millions of people worldwide, while our focus on inclusive design aims to ensure that everyone can benefit.

HP provides technology to support digital equity in education for girls.

**Bridging the digital divide**

In 2022, the Aspen Institute collaborated with HP to create the Digital Equity Accelerator—an initiative that supports nonprofits working to meet the needs of underserved communities affected by the digital divide. In its first year, seven nongovernmental organizations throughout India, Morocco, and the United States were selected for the four-month program. Learn more.
Products and services innovation

In 2022, HP spent US$1.6 billion on ongoing product development to create the transformative and disruptive technologies of the future.

We apply rigorous design principles to improve the environmental performance of our products across their life cycles. Among our main design priorities, we work to increase the use of recycled and renewable materials; practice responsible chemistry; enhance product repairability, reusability, longevity, and recyclability; continually improve product energy efficiency; build in accessibility features; and create solutions to meet challenges in healthcare.

Personal systems

The newest HP Dragonfly and Elite 1000 Series PCs contain 90% recycled magnesium in the enclosure case, 5% ocean-bound plastic in the speaker enclosure, and bio-circular feedstock such as used cooking oil to help lower CO₂ emissions. All outer packaging is also 100% sustainably sourced, and the products are EPEAT® Gold registered in 27 countries, ENERGY STAR® certified, and TCO certified.

During 2022, we shipped almost 70 million units of personal systems products in molded fiber or hybrid foam/fiber packaging, representing about 91% of units.

HP Carbon Neutral Computing Services help drive a low-carbon future by enabling commercial businesses to offset the end-to-end carbon footprint of their PCs.

Home and office printing

HP Color LaserJet Managed MFP E877 Series printers are EPEAT Gold registered and ENERGY STAR certified, and consume 17% less energy than their predecessor. They are made using over 16% recycled plastic content, and use supplies that contain about 60% recycled plastic content.

HP EvoCycle toner cartridges, introduced in France, Germany, and the UK, are designed to help public sector and enterprise customers meet their sustainability needs by incorporating reused and recycled components—45% by weight—from Original HP toner cartridges.

Large format printing

HP’s latest Z-series Pro printers are all EPEAT registered and ENERGY STAR certified, and are made of 20%-30% recycled content plastic.

Industrial print

HP’s latest PageWide Web Press inkjet printing solution, HP PageWide A2200, uses High Efficiency Drying (HED) technology to reduce power usage, which is a significant contributor to the carbon footprint of a print job. HED maximizes moisture removal at high speed and uses heat efficiently by recirculating up to 80% of hot air. This process uses up to 60% less power per page compared to the HP T250 HD.

3D printing

Podiatrists and orthotists using HP’s 3D Arize Orthotic Solution can capture 3D renderings of a patient’s foot, and fine-tune and prescribe personalized orthoses for their patients—all in less than five minutes.

Specialty printing and technology solutions

HP released the HP D100 Single Cell Dispenser, capable of rapidly and precisely dispensing single cells. This helps research labs improve their understanding of changes at the level of an individual cell, generating more insights to support scientists to make better decisions.

1. As of October 31, 2022. Includes employees from the Poly acquisition.

2. At October 31, 2022, our worldwide paid full-time included over 28,000 people, including employees acquired as a result of our acquisition of Plastics, Inc. ("Poly") in August 2022.

3. Reported in accordance with Corporate Knights Sustainable Economy "Toxonomy" (INL) motif included revenues from products certified to eco-labels (EPEAT® Gold/Silver; TCO, Blue Angel, and ENERGY STAR®). Products designed using recycled materials, but that have been recycled, reused, or distributed, is not as a service with end of life management policies.

4. includes responsibly managed for the period ending September 30, 2022. Data is for the 12 months ending September 30 of the year noted. Figures are reported in the 2021 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2021. Figures are not presented in the 2022 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2022.

5. HP defines "accelerating digital equity" as providing access to at least one of the following: hardware, connectivity, content, or digital literacy. Digital equity and learning outcomes data include both direct and indirect reach. Direct reach is sometimes based on estimates using multipliers. 2022 data includes a small amount of 2021 data that was not available at the time of publication of the 2021 HP Sustainable Impact Report.

6. 2022 data includes a small amount of 2021 data that was not available at the time of publication of the 2021 HP Sustainable Impact Report.

7. Calculated as the percentage of primary plastic packaging by (weight) reduced per unit shipped. Excludes secondary and tertiary packaging components. Includes HP personal systems and printer hardware packaging. Does not include packaging for the following Graphics Solutions Hardware other than PageWide XL and DesignJet printers. 3D product inventory includes 3D printed parts, and accessories such as third-party options, drop in box, and aftermarket options.

8. As of October 31, 2022. Includes responsibly managed for the period ending September 30, 2022. Figures includes sites worldwide. Zero waste is defined by the UL or TRUE certification authorities.

9. Includes recycled content that will come from recycled and renewable materials and reused. None of the cost savings was attributable to HP personal systems, printer hardware, and print cartridges.

10. HP includes responsibly managed for the period ending September 30, 2022. Data is for the 12 months ending September 30 of the year noted. Figures are reported in the 2021 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2021. Figures are not presented in the 2022 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2022.

11. Hourly rate is based on type of volunteering: US$195/hour for board, service corp, pro bono, and skills based; US$295/hour for hands on and underdetermined. Valuation of non-U.S. volunteering hours is adjusted using World Bank data for purchasing power differences across countries.

12. Reduces weight, that comes from recycled and renewable materials and reused. None of the cost savings was attributable to HP personal systems, printer hardware, and print cartridges.

13. HP includes responsibly managed for the period ending September 30, 2022. Data is for the 12 months ending September 30 of the year noted. Figures are reported in the 2021 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2021. Figures are not presented in the 2022 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2022.

15. HP defines "accelerating digital equity" as providing access to at least one of the following: hardware, connectivity, content, or digital literacy. Digital equity and learning outcomes data include both direct and indirect reach. Direct reach is sometimes based on estimates using multipliers. 2022 data includes a small amount of 2021 data that was not available at the time of publication of the 2021 HP Sustainable Impact Report.

16. HP includes responsibly managed for the period ending September 30, 2022. Data is for the 12 months ending September 30 of the year noted. Figures are reported in the 2021 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2021. Figures are not presented in the 2022 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2022.

17. HP includes responsibly managed for the period ending September 30, 2022. Data is for the 12 months ending September 30 of the year noted. Figures are reported in the 2021 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2021. Figures are not presented in the 2022 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2022.

18. HP includes responsibly managed for the period ending September 30, 2022. Data is for the 12 months ending September 30 of the year noted. Figures are reported in the 2021 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2021. Figures are not presented in the 2022 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2022.

19. HP includes responsibly managed for the period ending September 30, 2022. Data is for the 12 months ending September 30 of the year noted. Figures are reported in the 2021 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2021. Figures are not presented in the 2022 HP Annual Report on Form 10-K for the fiscal year ended July 31, 2022.

20. As a percentage of U.S. personnel with the title of executive, formerly called vice president.

21. Based on HP's action taken in 2022 when the HP Racial Equality and Social Justice Task Force was formed.

22. Includes hammer details. HP HxC/Neo advanced high quality printing hardware; print supplies; refurbished products; and accessories reduced per unit shipped. Excludes secondary and tertiary packaging components. Includes HP personal systems and printer hardware packaging. Does not include packaging for the following Graphics Solutions Hardware other than PageWide XL and DesignJet printers. 3D product inventory includes 3D printed parts, and accessories such as third-party options, drop in box, and aftermarket options.

23. Excludes new hires joining HP after January 1, 2022 (although all new hires are given 30 days to complete Integrity at HP New Hire training as part of their mandatory onboarding process).

24. HP defines "accelerating digital equity" as providing access to at least one of the following: hardware, connectivity, content, or digital literacy. Digital equity and learning outcomes data include both direct and indirect reach. Direct reach is sometimes based on estimates using multipliers. 2022 data includes a small amount of 2021 data that was not available at the time of publication of the 2021 HP Sustainable Impact Report.

25. We enable better learning outcomes by supporting education through provision of learning and digital literacy programs and solutions. Digital equity and learning outcomes data include both direct and indirect reach. Indirect reach is sometimes based on estimates using multipliers. 2022 data includes a small amount of 2021 data that was not available at the time of publication of the 2021 HP Sustainable Impact Report.

26. Includes vacant hours of employee volunteer hours, employee donations, HP Foundation match, and HP Foundation grants.

27. Includes employees who may have additional information unique to each customer (e.g., product ship-to location, product portfolio), we calculate the total carbon emissions for a customer's fleet. HP then purchases and retires carbon offsets, procured through Climate Impact Partners, which certifies HP's carbon credits.

28. HP EPEAT Gold or EPEAT Silver. EPEAT status varies by country. Visit www.epeat.net for more information on a country-by-country basis.

29. HP Dragonfly G4 back cover contains a resin partially derived from bio-waste such as used cooking oil. Incorporates waste bio-feedstock utilization the most current data on production practices, recycling, product quality, and usage trends (see: http://www.hp.com/go/EcoCycle/HP2021). The LCA leverages a 2021 Spencer Consulting study commissioned by HP, comparing Original HP CF226X toner cartridges with HP EcoCycle CF226XR toner cartridges. For details, see: www.spencerlab.com/reports/HPEcoCycle2021.pdf The LCA concludes that the HP EcoCycle has a 37% lower carbon footprint than the HP CF226X in the production phase and a 13% lower carbon footprint when looking at the entire life cycle of the cartridge.

30. Weight percentage where toner and components considered by HP to be critical to print quality (e.g., toner, imaging drum, developer blade, developing roller, and charge roller) are excluded: 36% reused, 40% recycled. Total 76% reused/recycled. Absolute weight percentage excluding toner: 21% reused, 24% recycled. Total 45% reused/recycled.

31. All estimates based on power measurements on the HP PageWide A2000, comparing average power used during printing for running power vs. the HP T250 HD. Results will vary based on press configuration, print speed, media types, print mode, color profiles, and print quality requirements. Page 1 = one page front and back.

32. Based on internal HP testing, March 2021. Actual results depend on many factors including patient-doctor interactions and specific patient conditions.
